

I am a subscriber to XM Satellite Radio, and I believe it provides a valuable service not accessible to me through local stations. Although I live in a rural area where reception is limited, I do continue to listen to my area radio stations for local news, weather, and programming. The variety and signal quality of satellite radio, however, is vastly superior to that of AM and FM radio. That is why I am willing to pay a monthly fee for the privilege to receive it. I strongly urge you to not support legislation which would limit the broadcast rights of satellite radio.

Thank you,

Vicki Stokes
